

**Thank you for participating in the City of Buffalo's
We Save Business energy rebate program!**

**Due to overwhelming customer requests for rebates,
2017 annual rebate funds have been depleted.
The City of Buffalo will continue to accept and
process rebate applications for approval in 2017;
however, rebates will not be payable until 2018.**

What's Next...

- Submit your rebate application as you would normally.
- Once approved, you will receive a letter confirming your rebate was approved and the rebate amount.
- Qualifying rebates will be paid after January 1, 2018.

Again, thank you for participating in the City of Buffalo's energy rebate program and helping us meet our goal of reducing energy consumption by 1.5% annually.

If you have questions, please call 763-682-5370 during weekday business hours.

2017 Lighting Retrofit Rebate Instructions

By participating in our We Save program, you can save energy and earn a rebate when you replace existing lighting with qualifying, energy-efficient lighting. See Rebate Calculation Table for rebate eligible products.

ENERGY STAR® and DesignLights Consortium Qualified Lighting
LED products must be listed on either ENERGY STAR or DesignLights Consortium (DLC) Qualified Product List. See Rebate Calculation Table for requirements by lighting type. Qualified product listings can be found at www.energystar.gov/products and designlights.org/QPL.

Rebate Qualifications and Program Rules

- Rebate offered to non-residential electric customers served by a local municipal utility (Utility) that is a participating member of MMPA.
- Rebate will be issued to the customer only. Maximum rebate amount shall be limited to 50% of project cost.
- Rebate Application must include a copy of paid, itemized invoice(s) showing quantity, price, manufacturer, and model number for each product for which you are requesting a rebate.
- Rebate Application must include both Pre-Rebate Worksheet and Rebate Calculation Table. Quantities and descriptions must reconcile.
- Retrofit systems must result in a net load reduction in kW usage from that of the existing lighting system.
- All lighting equipment must be new and meet specification requirements.
- Unless specified as exterior applications, rebates are for interior lighting applications only and lighting equipment must be operated during weekday on-peak demand hours (6am-9pm).
- Utility reserves the right to conduct inspections of any and all installations. One sample of each type of old lamp or ballast must be retained for at least 90 days. If Utility finds that customer has not complied with its rules and standards, any rebate customer has received must be returned.
- Rebate requests are processed on a first-come first-serve basis. Annual rebate funds are limited. Rebate programs, qualifications, and amounts are subject to change at any time.
- Installation must be completed before submitting rebate application.
- Customer must apply for rebate within one year of the purchase date shown on the equipment invoice.
- Rebate will not be given for equipment or designs that do not comply with local, state, or federal regulations.
- Utility is not liable for rebates promised to a customer as a result of a contractor misrepresenting the program.
- Utility will not be responsible for any tax liability imposed on customer as a result of rebate payment.
- Utility gives no warranty, expressed or implied, with respect to equipment operation or performance. Utility does not guarantee that the implementation of energy-efficient measures or use of equipment installed pursuant to this program will result in energy or cost savings. Utility is not liable for any incidental or consequential damage. Utility is not responsible for the disposal of lamps and/or ballasts as a result of this program.
- Information contained in rebate application may be shared with the Minnesota Department of Commerce and MMPA.
- Qualifying customers must apply for rebate by November 30, 2017.
